

LEGO Hopping Frog Ride

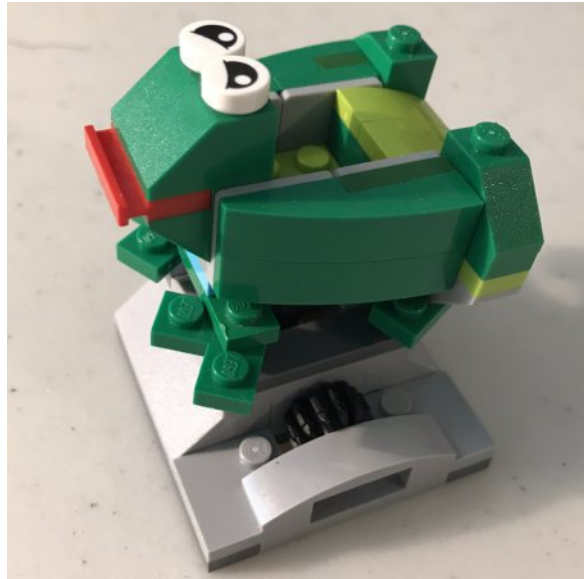

Princess Cassandra loves frogs! This is her favorite ride when she visits the LEGOLand toystore. And now you can make your own!

LEGO Hopping Frog Ride

In *The Princess and the Frogs*, Princess Cassandra finds a very special frog: the Great, Green Frog with a Bright, Blue Belly. That frog was the inspiration for this original LEGO creation. It really hops, and your LEGO minifigs can go for a ride!

First, gather the pieces you will need. Don't worry if you don't have the same colors as shown in the example. There are over 5,000 different species of frogs in the world, of all different colors! Feel free to create your own special frog!

Part 1: Build the Base

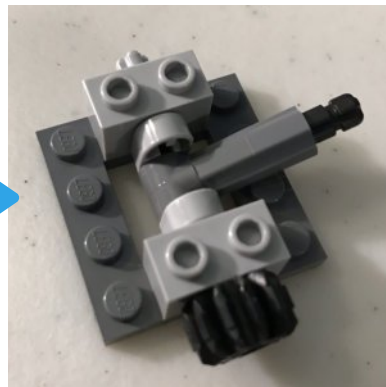

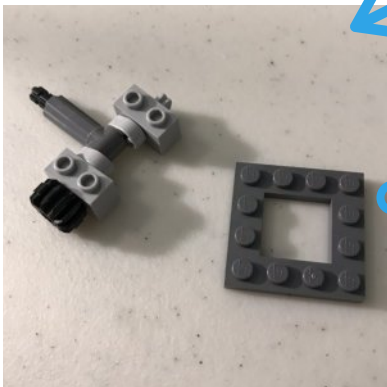

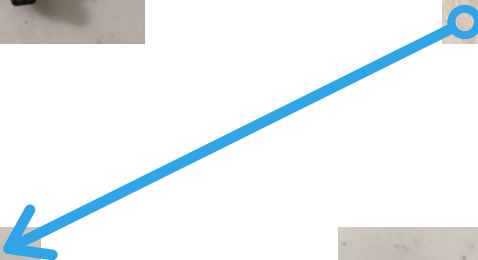

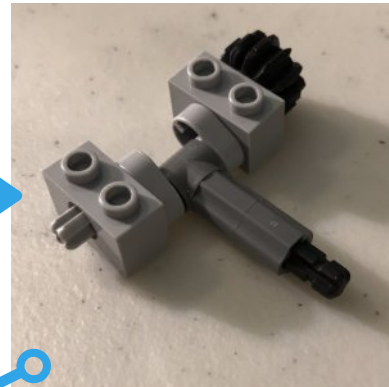

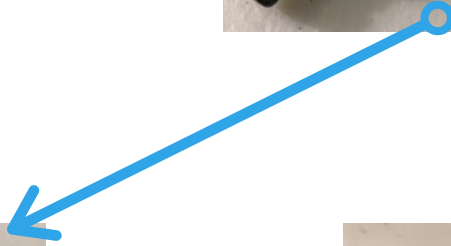

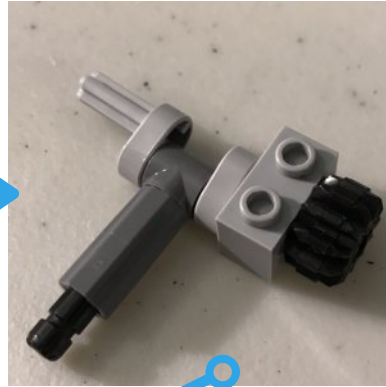

This is the part that allows your frog to hop. When it is all assembled, you can turn the wheel and watch the frog jump forward as the mechanism turns.

This section requires some special parts. If you don't have them, you can simply skip to part 2 to build the frog.

Part 2: Build the Frog

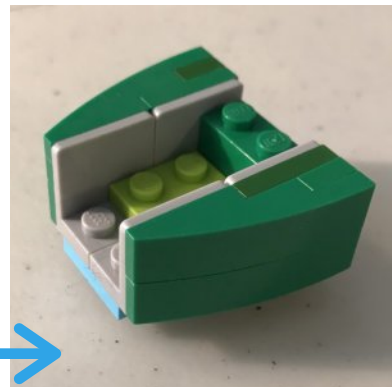

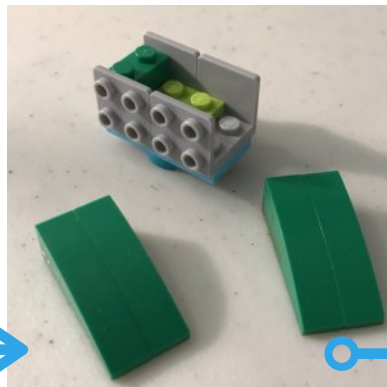

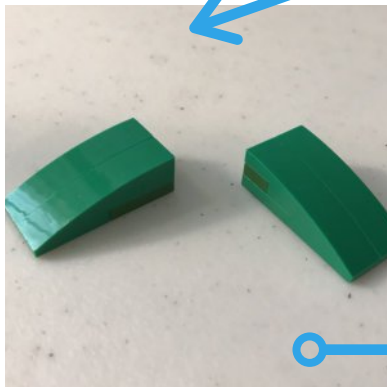

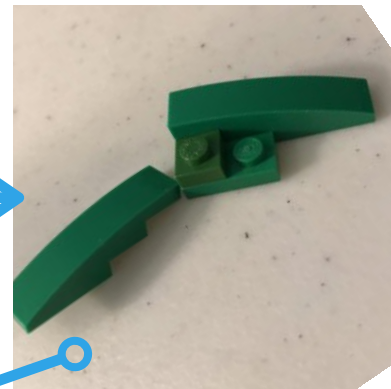

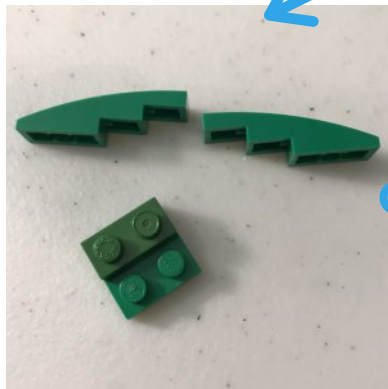

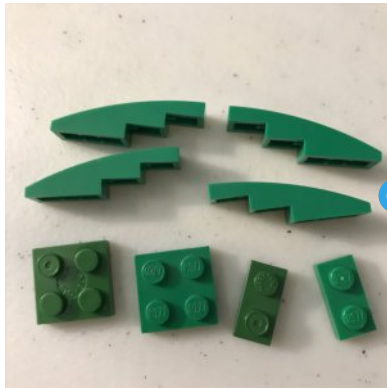

Don't worry if you don't have the same color pieces shown. Be creative! You can use different colors to make your frog look like one of the other 5,000 different kinds of frogs, or create your own special and unique frog!

Part 3: Put it Together!

Press the frog onto the base. The post should fit into the middle of the round piece on the bottom of the frog's belly. Then, add your favorite minifig to the seat, and turn the wheel with your finger to watch the frog hop!
